

## Product

# BLAST PROOF COOLER

## Light, Resilient and Blast Proof

Designed to withstand an underside IED or blast scenario

A **collapsible soft sided cooler** that is able to withstand an **underside IED or blast scenario**. Developed to prevent water bottles from turning into shrapnel inside of a vehicle during an explosion. The Cooler is **Patented & Licensed** from the Army Soldier Systems Center and has completed MIL-STD testing by the US Army, including blast, vibration, and corrosion testing.

## Why the Blast Proof Cooler?

- Tested to be blast proof
- Fire resistant
- Abrasion resistant
- Custom textile patterns
- Multiple sizes: Small (15"W x 3"D x 11"H) or Large (16"W x 21"D x 11"H)

## Blast Proof Cooler Capabilities

- Stores Water, MREs and a Five-Gallon Jerry Can at potable temperatures (~70°F)
- Contains Ice (0 - 72°F) up to 56 hours
- Accommodates the High Stress Collapsible Water Bag (HSCWB)—5-Gallon
- Remain secure to the vehicle when impacted
